

Setting Up Your Profile

On your first visit to TLA Engage, we encourage you to set up your profile by adding your photo, bio and social media links.

Your name as it appears in TLA Engage is the same as it appears in our database. If your name or other information is wrong in your profile, please login to TLA Members Only and Update TLA Profile (center column). That will update the membership database, which will automatically update TLA Engage within 24 hours.

Please know profile changes, especially for the social media accounts, may take a little while to go live. Everything else should update immediately.

- To upload a profile picture, look for the action button and select change picture.
- To update your bio, select the pencil button next to the word bio.
- To link your social accounts, click the green add button and then select the account you want to link.
